Green Hills Health Care Center receives High Performance rating

November 1, 2018 (AMES, IOWA) – Green Hills Health Care Center receives High Performance ratings with U.S. News. This source rates over 15,000 nursing homes to help people find the best fit for their loved ones. Out of the 439 nursing homes in Iowa, Green Hills was one of only 80 to receive an overall High Performance rating. The Green Hills Health Care Center received an overall rating of High Performing, as well as a short-stay rehabilitation rating of High Performing. The U.S. News overall ratings are based on resident conditions of long-term chronic care and short-term rehabilitation. Short-stay rehabilitation rating is based on several factors including the training level of staff, consistency of staffing measurements, physical therapy staffing, and patient-centered rehabilitation therapy. Both ratings of High Performing are recognition that the Green Hills Health Care Center is a high-quality center.

“We are very proud of the hard work of the entire community that tirelessly strive to provide optimal care for our residents.” said Steve, the Director of Clinical Services. “High ratings are evidence of the daily diligence of the team.” Kat, Administrator of the Health Care Center added, “We pride ourselves on high standards and quality of care for our residents. This High-Performance rating is evidence of our success.”

Green Hills Health Care Center offers long-term care and Medicare-certified skilled nursing, as well as professional Physical Therapy, Occupational Therapy, Speech Therapy, and Nutritional Therapy on an inpatient and outpatient short-term basis. We also offer memory support and respite care. To learn more, please call 515-357-5399.
